

Pathology Stores Ordering Process – Dry Flocked Nasopharyngeal Swabs

Background

Throughout the COVID-19 pandemic there has been an increased demand for dry flocked nasopharyngeal swabs to facilitate COVID-19 PCR testing. In order to manage the stock and supply of this item, we have moved from the usual ordering via Dorevitch Stores to requesting stock via the Western Health Supply and Logistics departments.

Goal

The goal is to ensure that all areas of the hospital have necessary and adequate supplies of dry flocked swabs to enable timely COVID-19 testing of our patients and our staff as the need arises.

Ward Process:

- NUM/ANUM/NIC to order the amount of swabs required by the department using the PPE restricted ordering template. The PPE team will then deliver as per delivery day schedule.
- Stock should be kept in a secure area with PPE.
- If supplies are running low during business hours (0730-1600) contact a member of the COVID-19 PPE Team on 0466 813 640 and they will provide you with what is required.

Staff access to PPE outside business hours

- Please contact the AHA at your site.
